Design/Build

Engineering Services

Our single-source in-house mechanical offerings include design/build with energy rebate audits, budget management from initial concept to final guaranteed proposal, sheet metal fabrication and installation, and fully licensed engineering. In every case, you work with experienced professionals who have a solid reputation for attentive and knowledgeable customer service.

NEMSI can meet your complete electrical requirements while helping you identify energy-saving opportunities and resolving critical electrical issues. In addition, our building automation services give you customized system control and energy management solutions. For added value, we can integrate these solutions into your information systems for faster, more responsive, more economical environmental management.

Add EMCOR's financial strength and knowledge transfer network, and you have a company that can meet your needs from one end of the critical path to the other, no matter how exacting the standards or rigid the specifications.

Think bottom-line performance

NEMSI offers a full range of planned preventive maintenance services, all aimed at giving you bottom-line value.

These services include:

- > Scheduled inspections tailored to your system and business requirements
- > Testing and timely replacement of all air filters, belts, cleaners, oil filters, and lubricants
- > Up-to-date maintenance records, including combustion efficiency reports, technician recommendations, refrigerant usage, and more
- > Professional engineering assistance
- > Complete and accurate repair quotes
- > Preferred customer service 24/7/365

Preventive maintenance activities like these keep your systems running efficiently, to help ensure consistent occupant comfort and productivity with minimal downtime and fewer repairs. At the same time, they extend your equipment's life for maximum return on your facility investment. The result is systems that support your business instead of draining your bottom line.

Experts who keep your systems running flawlessly—so you can concentrate on your core business.

NEMSI's fully licensed and certified team of experts undergo continuous training so that they are always up to date on today's leading-edge equipment and service techniques. Supported by New England's largest service fleet, they use state-of-the-art testing, calibrating, balancing, and other tools to tune your systems for optimum operation, reliability, and energy efficiency.

It all adds up to flawless performance, so you can do your job without doubts, worries, or downtime.

By helping to ensure optimum system reliability, reducing downtime and unexpected repair costs, and providing long-term investment protection, NEMSI's preventive maintenance services give you peace of mind, while playing a vital role in your business success.

Harnessing the Power of a Fortune 500® Leader

A Fortune 500® company, EMCOR Group, Inc. (NYSE: EME) is a leader in mechanical and electrical construction, industrial and energy infrastructure, and building services.

EMCOR specializes in planning, installing, operating, maintaining, and protecting the sophisticated and dynamic systems that create facility environments. This includes systems such as electrical, mechanical, lighting, air conditioning, heating, security, fire protection, and power generation.

With approximately 420 locations and 44,000 skilled employees, EMCOR works in virtually every sector of the economy for a diverse range of businesses, organizations, and government agencies.
